

What is a Patient Portal?

A patient portal lets you access your health information anywhere, anytime putting the power to connect in your hands. There are a lot of reasons to sign up for a patient portal: to get results from lab work and other medical tests.

To communicate with your healthcare provider, to ask a question, request a refill, and schedule an appointment. You can log onto your patient portal 24 hours a day, seven days a week anytime it works for you.

No more waiting on hold on the phone to get a question answered, a lab result, or schedule an appointment. Access your patient portal on any computer or mobile device at home, in the office, or on the go. You have the power to connect at your fingertips.

Whenever and wherever you need it! Sign up today!
