

Quarantine

There was a time, not that long ago, when everyone had a family member or friend who had been hurt badly by these germs.

Really?

Whole neighborhoods were quarantined. That means no one could come in or go out of their houses.

Trapped like rats.

Yes, and very sick, for days, sometimes weeks!

So why didn't they just go to the doctor for medicine.

Because, even now, there isn't much medicine that helps once you're sick from one of those germs. Mostly you just have to suffer through it and hope you get better.
