

Hypoglycemia

It's time for "What's That Mean?" Today....

If you begin to develop low blood sugar, that's called "hypoglycemia."

Signs are sweating, light headedness, getting shaky, weak, anxious.

Whoa...oooh! Uh...whoa...I'm really hungry.

That's another symptom.

Ooh, and I have a headache.

Headaches, trouble concentrating and thinking clearly are all signs.

Clapping
