

# Intravenous I.V.

It's time for "What's That Mean?" Today....

You may need to get liquids "intravenously" through an "I.V."

What does that mean?

That means through your veins.

They do that if you can't drink or if you're throwing up too much.

I've had that. It didn't hurt much. Just a little pinch, and it was kinda cool to see how it worked. Sort of like a little drinking straw for my arm.

Clapping
