

Weight

Announcer It's time for...What's That Mean?

Announcer Today: Weight

Lucy It's important for your care team to know how you're doing, so they will be collecting your vitals.

Lana One "vital" we take is your "weight." It tells us how big you are.

Lucy We check your weight a lot to see if it is changing while you are in the hospital. It can help us know if you're eating enough, or if there are problems we need to work on.
