

Nervous System

Announcer It's time for...What's That Mean?

Announcer Today: Nervous System

Lumina The human body is an amazing thing!

Lumina The nervous system transmits signals from every part of your body to your brain, and your brain interprets these signals.

Lumina Everything from a tickle, to a tap...

Lumina ...to a slap. Every feeling, every thought you have, is because of your nervous system, which includes your brain and all your nerves.
