

Sedation Team

Announcer It's time for...What's That Mean?

Announcer Today: Sedation Team

Maru During a procedure, you will have two teams helping you. A sedation team...

Lucy ...and a procedure team.

Lana Your sedation team will take your vitals before they begin in order to establish your "baseline."

Lana Your "baseline" is simply the condition you're in before sedation begins.

Lana The sedation team will give you the sedation medicine and keep an eye your vitals during and after your procedure.

Maru Your sedation team is gonna stay with you throughout the procedure and they're not gonna leave until you wake up and you're "back to baseline."
