

What's That Mean? – Leftover Medicine

Sometimes you might end up with more medicine than you need.

Only use the medicine as long as you need to relieve strong pain.

Never take someone else's medicine, or let anyone else take yours.

Always dispose of old medicines safely.

There are places that will take old medicines and dispose of them correctly. They are called "Drug Take-Back Centers." Look online or ask for a drug take-back center near you.

Visit www.FDA.gov and search for 'Disposal of Unused Medicines' or visit TakeBackDay.dea.gov.
