

Fast Fact: Mole Warning Signs

Early detection and treatment can prevent skin cancer.

That's why it's important to check your skin regularly for changes—especially any changes to moles.

There are many types, sizes, and shapes of moles. Most moles are solid brown.

Look for moles with changes in size, shape, color, or height.

Changes can include the size is larger than the size of a pencil eraser, the sides are irregular, they itch, or bleed.

To do all you can to protect your skin, wear sunscreen, sun protection, and talk to your doctor.
